

Pet Keeper:

Retractable doors operate on a top and bottom rail system. This makes the screen vulnerable to small pets pushing their way under the screen. The Pet Keeper is designed to easily attach with button snaps to the center frame members to block this from happening. The Pet Keeper is made of a pvc coated polyester and is available in black . 40" wide x 32" tall.

Milano Locksets:

The Milano Lockset consists of an upper and a lower slide bolt that fits into the t-groove on the pull bar of the Milano retractable door. When actuated, the lockset keeps the pullbar from being opened. The locksets are located on the inside of the retractable door unit.

The Milano Lockset is available in white or black.

Locked

Un-locked

Push Bar Assembly:

The Push Bar assembly comes installed on all 8' tall Lifestyle Screen units. For those wishing to have it on the 7' models, this can be ordered from the factory. The Push Bar Assembly helps those that need a helping hand in the height department. Measuring 30" in length, the Push Bar Assembly will help give you the height you need. The push bar receiving plug is mounted into the inside section of the bottom horizontal.
